SNAKE FLEX BELTING

BELT REPLACEMENT FOR SANDWICH CONVEYORS

When was your last belt replacement? Do your belts conform strictly to the original specification? Did you receive an ISO 9856 testing report for the actual belt supplied?

Too often, incorrect belting has been installed to put systems back in operation. The incorrect belting results in spillage and damage to belting and components. Operating and maintenance costs go through the roof, simply because users don't realize how important the correct belting is to their operation.

QUALITY CONTROL

The Snake Flex program ensures the utmost quality and strict compliance to the required modulus. Only the highest quality belting, conforming to the strict DSI specifications will be ordered. All belting will be tested following production for physical compliance, correct mechanical properties and especially elastic modulus. Long term elastic modulus compliance is ensured by special testing per ISO 9856.

WHY CHOOSE DOS SANTOS INTERNATIONAL?

Dos Santos International is the world's foremost authority on the sandwich belt high angle conveyor technology. J.A. Dos Santos, founder of DSI, developed the sandwich belt technology in the early 1980s. Mr. Dos Santos, the inventor of the most successful sandwich belt systems, engineered, delivered and started up more sandwich belt high angle conveying units than anyone in the history of this technology. **You will not find any one on the planet that knows more about your Sandwich belt high angle conveyor than Dos Santos International.**
